Profile

Passionate and detail-oriented **MERN Stack Developer** with hands-on experience in building responsive, user-friendly web applications and admin dashboards. Skilled in developing full-stack solutions using **React.js, Node.js, Express.js, and MongoDB**, with a focus on clean UI/UX and performance. Proven ability to take ownership of projects from concept to deployment, demonstrated through real-world projects like e-commerce platforms and job portals. Adept at working in fast-paced environments and collaborating within Agile teams. Actively seeking opportunities to contribute to innovative products and grow as a professional developer.

Projects

E-commerce

Baby Products E-commerce (React.js)

- Built a responsive e-commerce frontend for baby products using React.js.
- Created user side features: product browsing, filtering, cart, and checkout flow.
- Developed admin panel to manage products and view orders (CRUD operations).
- Used JSON Server to simulate REST API for development and testing.
- Implemented React Router, hooks (useState, useEffect), and local storage for cart handling.

Part-Time Job Finding

Part-Time Job Finder for College Students(Django)

- Developed a full-stack web app using Django for connecting college students with nearby part-time jobs.
- Implemented separate portals for students (job seekers) and shop owners (job providers).
- Students can browse, filter, and apply for jobs.
- Shop owners can post jobs, view applicants, and manage listings.
- Used Django's authentication system for secure login and role-based access.
- Designed clean, responsive UI using HTML, CSS, and Bootstrap.
